

MILES & KELLEY
CONSTRUCTION

PROVIDENCE HOLY CROSS

**PROJECT:
PALLIATIVE CARE PATIENT
ROOM**

**ARCHITECT:
PUCHLIK DESIGN
ASSOCIATES**

PROJECT SCOPE

Miles & Kelley was awarded the contract to remodel a patient room in the palliative care department. The room was created to comfort the patient and their family during difficult days. Design elements include green acrylic artwork by dTank built into the headwall, a large privacy designer glass screen by Skyline and modular furniture by KI which matches the wood veneer ceiling.

The work included the installation of a beautiful custom arched wood veneer ceiling designed to cradle the patient in comfort. Specialty illumination, by USA Lighting, provides simulated dawn-to-dusk color rendering light, while complex flooring shapes highlight the patient bed area.
